AGENDA

- **New era of CX**
 - State of CX 2023 & The Role of AI
 - Organizational Challenges
 - Trends 2024
- **Automated Topic Detection & Revenue at Risk by e-satisfaction**
- **How to Navigate the Future**

AI/ML UTILIZATION IN RETAIL FOR CX - EXAMPLES

Chatbots and Virtual Assistants
Voice Assistants

Personalized Product
Recommendations

Generative AI for Product Content

Augmented Reality (AR) for Try-Ons

Dynamic/Smart Pricing

Cashierless Technology in-store

Predictive Analytics for behavior and
preferences

Sentiment Analysis

Automated Customer Insights

Which three customer behaviors influenced your 2023 planning the most?

- Awareness of ethical working conditions
- Customers spending more
- Customers spending less
- Demand for convenience
- Demand for home delivery
- Demand for sustainable/ethical products and brands
- Expectation for instant service/delivery
- Increased used of buy now pay later (BNPL)
- Use of social media for product/service research
- Increased usage of digital channels

**CUSTOMER BEHAVIOR
THAT LEADS TO
TRENDS ADOPTION**

ORGANIZATIONAL CHALLENGES in CX

The 10 most common challenges in CX

Competing priorities 36%

Creating actionable insights from data 34%

Assigning internal CX responsibility 28%

Building a customer-first culture 27%

Ensuring business continuity 19%

Linking CX initiatives to ROI 18%

Gaining senior management buy-in 14%

Implementing digital solutions 13%

Implementing AI effectively 12%

Rapid changes in technology 12%

0%

50%

CX Challenges in European Organizations

Refocused IT/digital initiatives for improving operational efficiency

36%

Legacy infrastructure prevents us from being agile

28%

Inconsistent CX metrics/KPIs across different business functions

27%

Challenged to prove business value/ROI from CX transformation initiatives

26%

Organization struggles to be customer centric

26%

Organization structure is too siloed

24%

Proliferation of tools used for CX

23%

Missing customer data points and customer data silos

21%

Lack of skills and people to improve CX

20%

CX TRENDS THAT WILL SHAPE 2024

New way of personalization - the traditional personas no longer accurately reflect the thinking that drives purchasing behaviour

Use AI and LLMs for efficiency & analytics

BUT

Approach AI for engagement with caution - there is still a mismatch between an organization's desire to introduce AI chatbots, and a customer's acceptance to engage with AI

Generative AI and LLMs will continue to drive new CX capabilities

SO

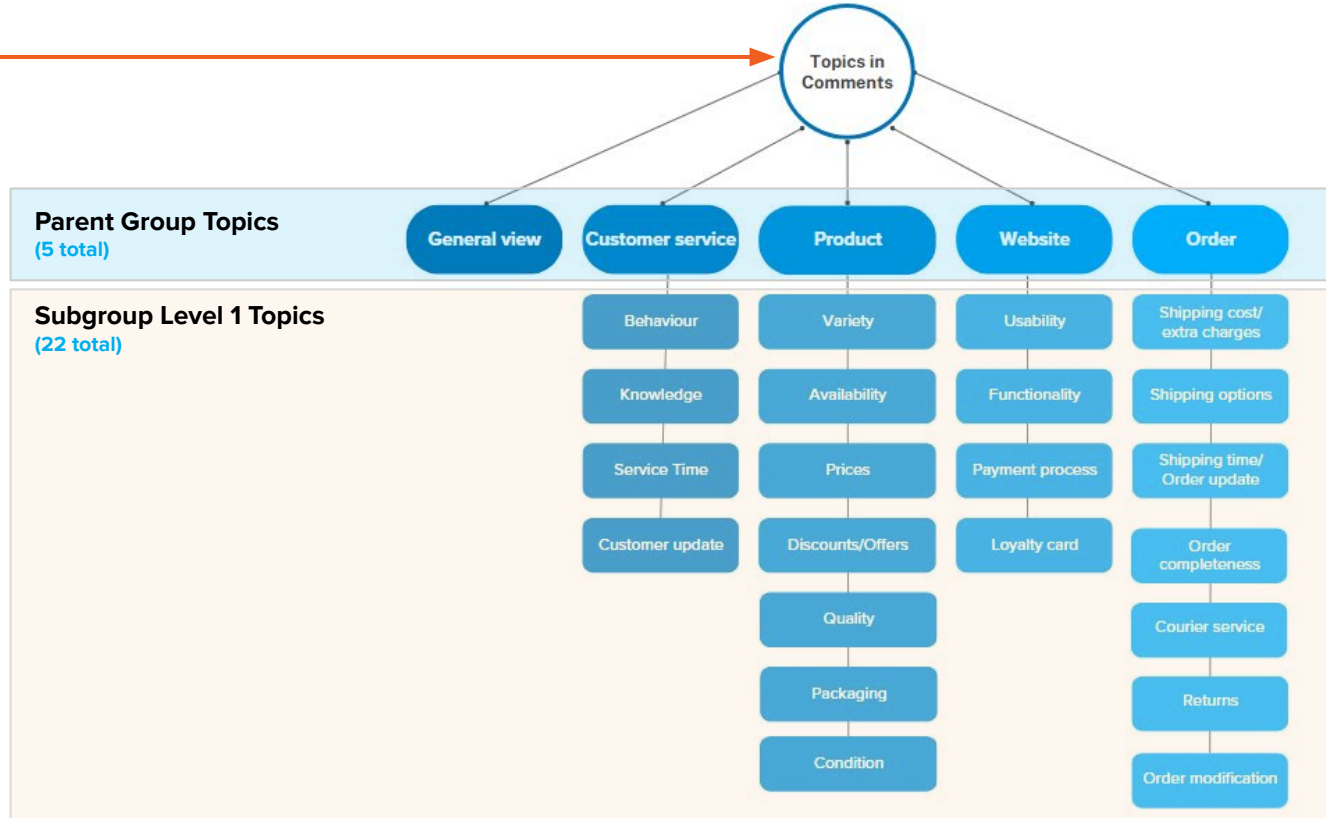

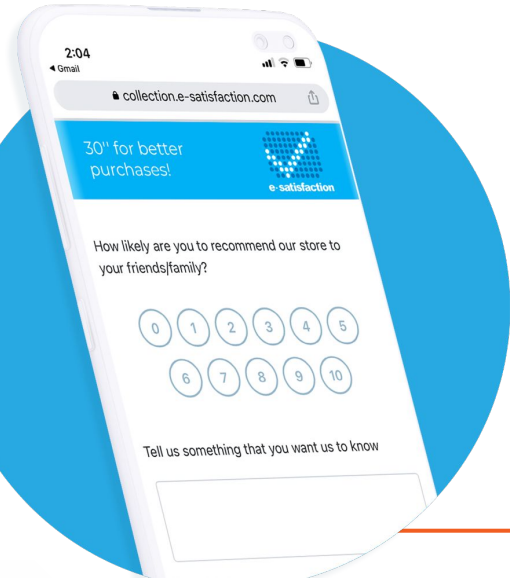

Include CX data into segmentation & communication initiatives

Exploit AI for consumer behavior patterns or predictive analytics

Experiment with AI for Digital Service Channels
but don't forget the quality of the resulting experience for the customer

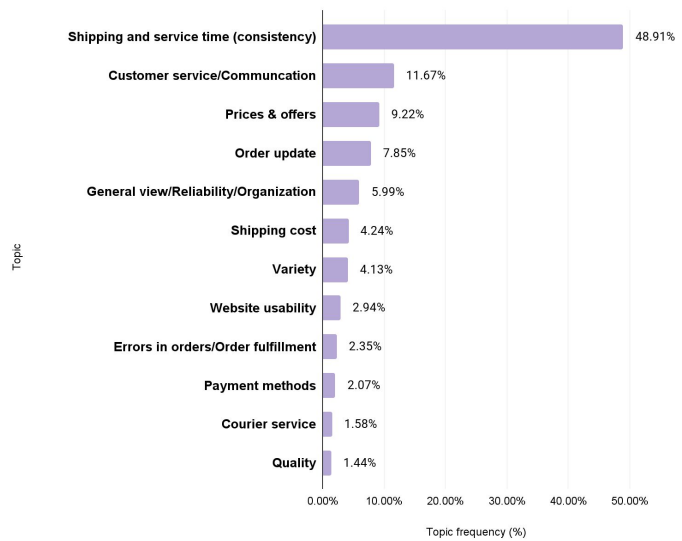

Aim for harmony between human and AI

AUTOMATED TOPIC DETECTION FOR RETAIL - PREDEFINED TOPICS TO UNDERSTAND CUSTOMER EXPECTATIONS

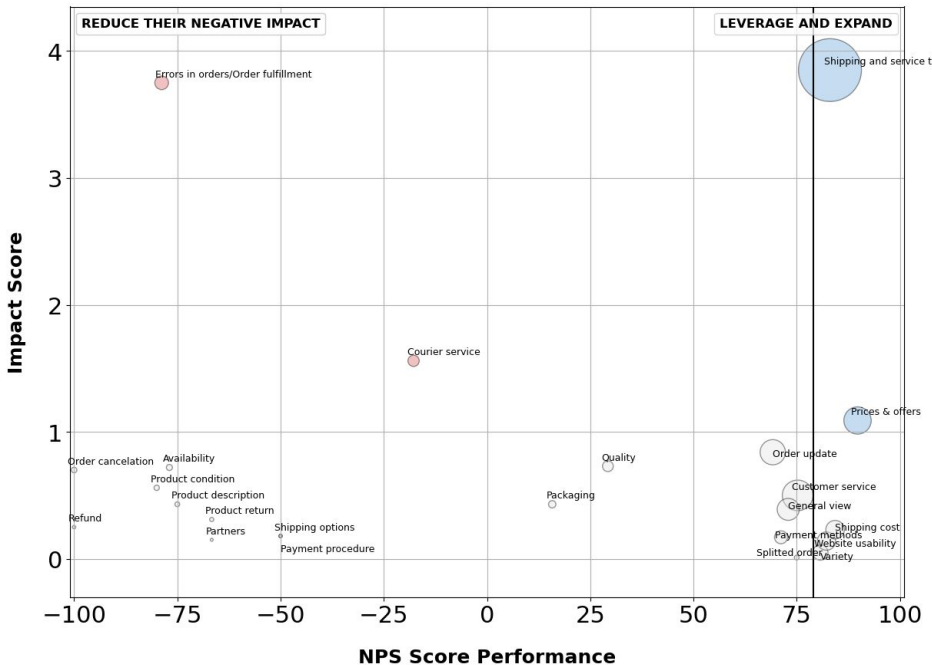

TOPIC DETECTION IN COMMENTS

Our **proprietary NLP model**, analyzes open text feedback pieces and discover the main topics addressed by your customer with >80% accuracy levels.

IMPACT SCORE PER TOPIC

TEXT ANALYTICS FOR TOPIC DETECTION

Automated Topic Detection & Revenue at Risk by e-satisfaction

To which topic and NPS segment is most of the revenue allocated? (2,854 comments)

Topic	Total Comments	Detractors (%)	Passives (%)	Promoters (%)	Revenue at Risk from detractors	Potential Revenue from Passives	Revenue from Promoters
